

# PROMPTUS

## **About Promptus**

Promptus is a Berlin-based business angel boutique. We invest in ideas but very much also like to pursue our own ventures. One of the successful businesses we launched is Hotel MSSNGR, a leading software solution for guest communication in hotels. Our product-driven team consists mainly of Developers, UX Designers and Product Managers. Promptus was founded in 2011.

## **Position**

For our long-standing customer, a German top 5 wholesaler/retailer for construction materials, Promptus handles all technical development of their client-facing internal and e-commerce tools. Specifically for this project, we are seeking a long-term Frontend developer to join our team, ideally present in Berlin. The ideal candidate has expertise in creating innovative consumer software products and thrives in an agile, collaborative and data-informed environment. The candidate will help drive consumer product innovation in close collaboration with the product owners and clients. In the future, you might also become the team leader of our distributed development team. The successful candidate will be an expert communicator and multi-tasker and have a passion for developing to deliver a rock-solid product with superior UX.

## **Responsibilities**

- In an agile team, you will be working on the desktop and mobile web clients that connect to the CMS and eCommerce platform via our API
- You will help improve and maintain the code and create with us the next generation of our Web Apps
- Oversee and develop architectural solutions for frontend and eventually hybrid mobile apps
- You will cooperate with cross-functional teams here in Berlin and distributed through Europe
- Continuously discover, evaluate, and implement new technologies to maximize development efficiency

## **Required skills**

- At least 2 years of working experience in frontend development – agile is strongly preferred
- Proficient knowledge of JavaScript, TypeScript, and ReactJS. Basic backend knowledge in Ruby is preferred

# PROMPTUS

- Ubuntu Server or other UNIX-based server administration (experience with server provisioning via Ansible a plus)
- DRY is one of your top programming principles
- Test-driven development
- In-depth knowledge of version control systems, preferably Git
- You can visualise data and build user interfaces using TypeScript, ReactJS, HTML and CSS
- Basic knowledge in Cordova is helpful in the deployment cycle
- Fluent in English
- Basic German language skills are a plus

## **Benefits and perks**

- 5 weeks of paid vacation
- No stupid meetings
- An awesome loft office in Berlin-Kreuzberg
- Multiple social events, e.g. team dinners, culture & sports, retreats
- A culture of working remotely
- A fantastic team
